Clinical Vignettes

Submissions should highlight an interesting case that will be educational to others in internal medicine. Submissions may be based on patients with diseases anywhere on the spectrum from common to rare but should illustrate key points such as diagnostic or management challenges pertinent to internists. Please only submit cases in which you were directly involved in the patient’s care.

Format

Title

Learning Objectives: one to three points that succinctly describe what the reader/listener should take away from this case

Case Description: Present key information from the history, exam, diagnostic evaluation and clinical course.

Case Discussion: a concise discussion of the key elements of the case as they pertain to the stated learning objectives and supported by relevant literature. Consider including how what you learned from this case will change your diagnostic or management approach in the future.

Category: Assign one of the following categories that best fits your submission

Primary Care
Cardiology
Endocrinology and Metabolism
Geriatrics
Gastroenterology
Hematology and Oncology
Infectious Diseases
Nephrology
Neurology
Pulmonology and Critical Care
Rheumatology

Reminder Word Limit: 450 words in the abstract body; see guideline instructions
